

Job Description

Senior Software Developer – FinTech (Trading Platform)

Location: Raipur (Onsite)

Experience: 3+ Years

Employment Type: Full-Time

Department: Engineering

About the Role

We are looking for a highly skilled Senior Software Developer with strong expertise in backend development and a passion for building high-performance trading applications. The ideal candidate should have hands-on experience in the FinTech domain, particularly in stock market and trading platforms, along with expertise in scalable server-side development and cloud-native technologies.

You will work closely with cross-functional teams to design, develop, and optimize mission-critical applications that require low latency, high availability, and exceptional performance.

Key Responsibilities

- Design, develop, and maintain scalable backend applications for trading and financial systems.
- Develop high-performance APIs and services using Python and C/C++.
- Build secure, reliable, and low-latency applications for trading workflows.
- Collaborate with product managers, architects, and DevOps teams.
- Optimize application performance, memory usage, and execution speed.
- Work with Kubernetes and containerized deployments.
- Participate in code reviews and troubleshooting.

Required Skills & Qualifications

- 3+ years of professional software development experience.
- Strong expertise in Python, C, and C++.
- Go (Golang) is a plus.
- Strong knowledge of Data Structures & Algorithms.
- Experience with REST APIs, Kubernetes, Docker, Linux, Git, CI/CD, multithreading and concurrency.

Domain Expertise

- Strong understanding of Stock Market and Trading Systems.
- Experience in FinTech, preferably Trading Platforms, Brokerage Applications, OMS/RMS, Exchange Connectivity, Market Data Systems, and Algorithmic Trading Platforms.
- Knowledge of trading protocols and real-time market data is preferred.

Preferred Skills

- Go (Golang).
- Microservices Architecture.
- Message brokers (e.g., MSG91 as specified).
- Redis, PostgreSQL/MySQL/NoSQL.
- Agile/Scrum experience.

Soft Skills

- Strong analytical and problem-solving skills.
- Excellent communication and collaboration.
- Ownership mindset and ability to work independently.

Why Join Us?

- Work on cutting-edge trading products.
- Collaborative engineering culture.
- Exposure to high-performance, low-latency systems.

- Strong career growth opportunities.
